

ARTIST: ST ANDREW'S HIGH SCHOOL FOR BOYS

We love to work in a variety of media, learning new skills and techniques that are transferable across the different subject areas in the school. You will find that our creative outcomes are often an exciting combination of the Creative Arts and STEM subjects - Science Technology, Engineering and Maths. We love making sculpture and 3D work so being involved in the Worthing Light Festival was an opportunity not to be missed.

As a school, we have a strong Arts background and have always been involved in local community projects over the years including 'Worthing Artists Open Houses', 'Art on the Pier', Remembrance services and The Worthing Children's parade.
